TANKS  
FOR LIQUIDS

# ONE-PIECE TANKS THAT RESPECT AND PROTECT LIQUID FOOD PRODUCTS

Agriflex tank structure is **ideal for storing liquid raw materials**. Tanks have a **one-piece structure with no fixing points or bolting which may release particles inside the tank**. They are suitable for both indoor and outdoor use. Depending on the product to be stored, they can be fitted with **heat exchange jacket** with insulation, internal temperature control system and related **backup systems**, and specific tools like **scrapers** and **agitators**.

## ADVANTAGES

### ONE-PIECE STRUCTURE

One-piece structure with no fixing points which may release metal particles inside the tank.

### INSULATED PIPING

Agriflex tank pipes are insulated to prevent any heat stresses to the liquid products (too hot/too cold).

### TEMPERATURE CONTROL

The temperature inside the tanks can be fully controlled.

### OPTIONAL USE OF NITROGEN

To remove oxygen inside the tank and prevent the oxidation of products prone to oxidation.

All our products comply with:

All regulations for specific applications  
(ATEX, food regulations, safety, seismic  
codes etc.)
